I am on vacation.

We have 2 original frac tanks to complete, 2 frac tanks of waste we generated, 4 ASTs plus sludge in most of the 23 ASTs, 19 waste water treatment tanks, drums/vats/totes/misc containers, liquid/solids removal from sumps, concrete/asphalt cleaning.

See [epaosc.net](http://epaossc.net) "CES Environmental Services".

I will send last update on expenditures

I spoke with the attorney representing Lubrizol. He wanted to know the status of the cleanup. They are interested in taking over the removal through the Voluntary Cleanup Program. Also, do we have a public/informational meeting scheduled? If so, when? Any help is appreciated. I'm in the office today and Friday only this week.
